

What is that? Is it a new species?

Hi I'm
Inco@MH
V2164VH
PS

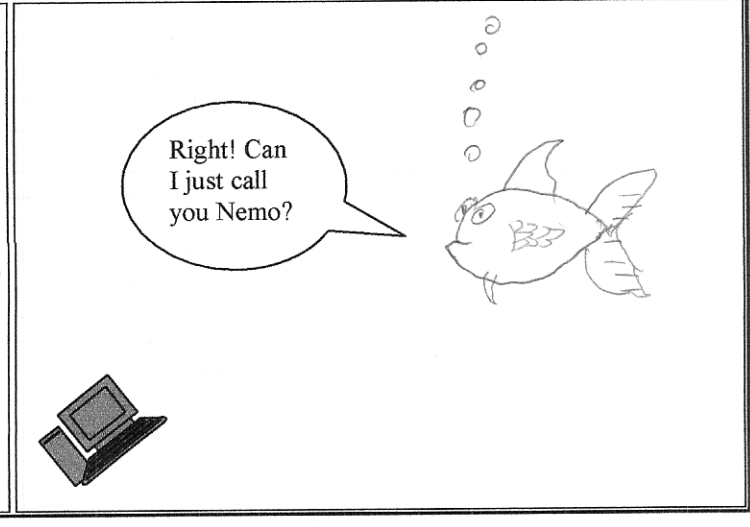

Where did you come from?

I was designed in the USA... manufactured in China and India, assembled in Ireland, programmed in Hungary...

... sold and used in France, found defective and shipped to Germany for recycling.

The ship I was on must have sunk and I ended up here.

Right! Can I just call you Nemo?
